

Quantum Mini Keyboard

QHMP announces the launch of QHM 7307 Chocolate Mini USB Keyboard, distinctly designed to reduce muscle strain and make users feel more at home while working.

The newly launched peripheral is ultra-portable and is aided with 78 chocolate keys that are ergonomically designed to reduce typing stress, arm muscle strain and typing errors. It is also built with 10 multimedia hot keys that let you enjoy the convenience of

controlling all your machine's multi-media functions with ease and accessibility. Adding more to it, the QHM 7307 is built to last with its long 10 million key press lifecycle and also sport a laser print keys that do not fade off easily for further durability. Its low travel distance reduces finger fatigue compared to traditional travel distance keyboards and its slim size takes up little space on the desktop making it an aesthetically better match to your LCD screen. Tagged with a 1 year warranty, the QHM 7307 is available across leading ecommerce portals and retail stores.
